

FVR90 & FVR34 USPs

FVR Unique Selling Points

- **More Power**
 - More efficient common rail engine with better fuel efficiency
- **Reinforced Chassis Frame**
- Improved chassis frame strength & durability (prevents chassis cracks)
- **Improved tractive Force**
 - Enhanced torque
 - Improved clutch & brake life
 - Improved starting ability
 - Improved climbing ability & load carrying capacity
- **Rib Lag Tubeless Tires**
 - Good for off-road terrain operations (sand harvesting)
 - Higher mileage
- **Enhanced Driver Comfort**
 - Wider cabin with many clever storage compartments
 - Wider sleeper cabin
 - Instrument panel with quick -read meters
- **Enhanced Driver Safety**
 - Reinforced cab, wide mirrors for better visibility, bigger headlamps
- **Longer Service Intervals**
 - 10,000kms
- **Warranty cover**
 - 1 years, 100,000 kms
- **Euro 2**
 - Environmentally friendly
- **Price**
 - **FVR90** KES 6,990,000
 - **FVR34P** KES 8,588,000

Why FVR90?=> MORE Robust!

ISUZU

- **Ease of AFS transition for customers**
 - Same engine and transmission retained
- **Improved overall Gross Vehicle Weight (GVW)**
 - FVR90 15 tons
- **Higher capacity rear axle**
 - Higher Gross Allowable Weight
 - Axle with improved durability - robust rear differential system that better support sand harvesting application
 - Improved clutch life
- **Improved startability**
 - Easy to start and move out of the riverbed when loaded.
- **Increased chassis thickness**
 - 8.0mm
 - 4.5mm reinforcement insert
- **Increased rim size**
 - 7.5x22.5 (8 studs) to 8.25x22.5 (10 studs)
